Article 42. Will the Town authorize the Treasurer with the approval of the Selectmen to hire what money may be needed in anticipation of taxes of the current year, to be paid as soon as money sufficient for the purpose is received?

Voted: That the Town Treasurer, with the approval of the Selectmen, be and hereby is authorized to borrow money from time to time in anticipation of the revenue of the financial year beginning January 1, 1921, and to issue a note or notes therefor payable within one year, any debt or debts incurred under this vote to be paid from the revenue of said financial year.

Article 43. In what manner will the Town collect the taxes and at what time shall they be paid into the treasury?

Voted: That the taxes assessed for the current year shall be due and payable on the fifteenth day of October next; and on all taxes remaining unpaid on the first day of November next, interest not exceeding six per cent per annum, from the fifteenth day of October to date of payment, shall be added. The interest accruing under this vote shall be added to, and be a part of such taxes.

Article 44. What compensation will the Town allow the Collector of Taxes for the current year?

Voted: That the Collector of Taxes be paid an amount equivalent to a commission of one per cent on all taxes collected.

Article 45. To hear the report of any committee heretofore chosen or appointed and act thereon.

Voted: To accept report of Harbor Improvement Committee and the Committee be continued for another year.

“ To the Voters of the Town of Cohasset:

At the March, 1920, meeting the Town voted to instruct the Moderator to appoint a committee, consisting of the Chair-

man and Clerk of the Board of Selectmen, the Chairman and Clerk of the School Committee and five citizens, to make a study of the questions relating to further school accommodations in Cohasset and to present specific recommendations to the Town not later than its next annual meeting; their report to consist of the following:

First, a report to reduce the system and get along with present accommodations.

Second, a report to enlarge the school plant so as to accommodate the present system properly and provide adequate accommodations for physical education and auditorium.

Third, a report after conference with the Selectmen and the American Legion for a combination of school accommodations, assembly hall and business offices, or both, and a memorial hall.

Fourth, to report as to the advisability of undertaking to finance the plans provided in the second or third report in whole or in part by voluntary contributions.

Pursuant to this vote the Moderator appointed as a committee Messrs. Mapes and Brown of the Board of Selectmen, Messrs. Stanley and Beal of the School Committee, and Messrs. C. Keefe, C. W. Gammons, E. N. Tower, J. E. Grassie and I. F. Sylvester. On account of Mr. Stanley's absence in Europe with the Boy Scouts the Moderator appointed in his place Mr. Shuebruk of the School Committee.

The Committee met and organized by electing Mr. Shuebruk temporary chairman and Mr. Beal secretary.

As a result of their consideration and the reports made to it by sub-committees, the Committee reports specifically, as instructed by the vote of the Town.

First: No plan to reduce the school system and get along with present accommodations is practicable. The only methods of reducing the school system are by eliminating certain so-called special or extra courses, such as the manual training, household arts, commercial courses and kindergarten. These courses are all carried on in quarters which could in no way be adapted for the regular courses. The manual training is carried on in the basement and the commercial courses on the third floor of the Osgood Building; the kindergarten and household

arts course are conducted in the Bates Building. None of these rooms could be used in any satisfactory way to relieve the present over-crowded conditions of the rooms where the so-called regular and essential courses are conducted.

To drop the special courses would result in a saving in the operating expenses of the schools, but would in no way help to relieve the over-crowded condition of the rest of the school. This is something which can be accomplished only by new quarters for some of the regular classes either in the elementary grades or in the high school.

Second: The Committee has had two suggestions for enlarging the school plant so as to accommodate the present system properly and provide adequate accommodations for physical education and an auditorium.

The one involving the least present expenditure would call for a six-room building to care for the kindergarten and four lower grades. If this suggestion were adopted the building should be planned so that it could later be turned over into a modern high school building.

The other plan would call for the construction of an eight-room building to be used as a high school. The present building, with the addition of few windows could be made into a very satisfactory twelve-room building with a small assembly hall. This would accommodate the eight grades and kindergarten, allowing for an extra sixth grade room, an extra first grade room, and one other extra room. The present manual training room would make a very satisfactory lunch room.

Third: The Committee realized that the Town needed, in addition to greater school accommodations, an assembly hall large enough to accommodate the voters and better facilities for Town Officers, and also that the Legion is planning to provide itself with suitable and permanent quarters.

It is evident that greater utility for all three of these objects and a decided economy in construction would be secured by combining the additional school quarters, Town Hall and offices, and Legion building either in one building or in one group of buildings. For example, the School Department and the Legion both need an assembly hall, but they could con-

veniently use the Town Hall if it was located near their buildings. The School Department and the Legion both believe they should have a gymnasium and they could both use the same gymnasium if located near enough to both school and Legion buildings. There would be further economies of construction, heating, general maintenance, grounds, etc.

In furtherance of this idea sub-committees were appointed.

The results of the investigations made by the Sub-Committee on Schools, which was assisted by the Superintendent, Mr. Collins, have been given under the first and second headings of this report. The reports made by the Sub-Committee on Town Hall and Legion quarters were submitted by the Committees to Messrs. George F. Newton and Joseph N. Willcutt, who gave a great deal of time in studying the project and in preparing sketches, floor plans and approximate estimates of cost.

The Committee on Sites procured the services of Mr. John Nolen of Cambridge, town and city planner and landscape architect, and the possibilities of the Town were thoroughly canvassed. As a result this sub-committee recommended as the only practicable sites for a combination of these three buildings the Cousens and Andrews properties adjoining the present school lot on the southerly side of Elm Street, directly opposite the Osgood School building and now occupied by the Bates Building and private owners.

No steps were taken to estimate the cost of securing either of these sites.

Since the Committee organized and after the greater part of its work was done, the situation regarding a Town Hall has changed materially. In the near future the number of qualified voters will be at least double what it was a year ago; and the Legislature has refused to recommend any amendment to the Constitution which will permit towns of less than four thousand inhabitants to organize on any precinct voting plan.

Of course it is impossible for the Committee to foresee what action the Town may take to provide accommodations for its Town meetings, which are required by law, but it is apparent that the necessity for a new Town Hall is vastly more pressing

and immediate than it was a year ago. Even if the Town should be disposed to go forward with a plan for a group of buildings such as has been suggested, it might feel that a new Town Hall could not wait upon the development of the entire plan. This possibility, the Committee feels, makes it all the more imperative that, in any plans for Town building, all of the future needs of the Town should be kept in mind.

Fourth: Several suggestions were made regarding the possibility of private subscriptions in aid of the project and in particular it seemed probable that a good deal of help could be secured in defraying the cost of a Legion building. As the plans and even approximate costs are all so indefinite, however, it has been impossible to make any progress along these lines.

Appended to this report is a sketch made by Messrs. Newton and Willcutt. It is not intended in any sense as a definite or final plan of even what the Committee might recommend, but merely as a suggestion of the possibilities contained in one method of developing a combination of the three needs of Cohasset today — a new Town Hall, a High School building and a Memorial Building for the George H. Mealy Post of the American Legion.

The whole cost of the building suggested might approximate \$300,000 exclusive of the site, but the part of the building devoted to the Legion would presumably be provided for by private subscription.

We recommend that a committee of five be appointed by the Moderator, of which the Chairman of the Board of Selectmen shall be one, to secure plans, specifications and definite estimates of the cost of constructing the buildings referred to and to secure definite estimates of the cost of acquiring either of the sites suggested."

Voted: That the above report be received and placed on record and that a committee of five, of which the Chairman of the Board of Selectmen shall be one, be appointed by the Moderator to continue the investigation relative to the construction of a schoolhouse and Town Hall in connection with quarters to be erected by the George H. Mealy Post of the American Legion, with instructions to secure plans, specifica-

tions and definite estimates of costs, including costs of sites, on the alternative plans suggested by last year's Committee, and that the sum of \$500 be raised and appropriated for necessary expenses of the Committee.

Article 46. Herbert A. Tucker and others. Will the Town raise and appropriate the sum of \$2,500 for the dredging of Cohasset Harbor?

Voted: That the Town raise and appropriate the sum of \$2,500 for the dredging of Cohasset Harbor; to be expended provided a sum satisfactory to the Selectmen and Harbor Committee is allotted by the Department of Public Works of the Commonwealth during the current year to be used with the sum appropriated under this article.

Article 47. George F. Sargent, Jr., and others. Will the Town raise and appropriate the sum of \$2,500 to be expended under the direction of the Highway Surveyor, to build a macadamized road from the Scituate line on Church Street to the corner of Doane and Beechwood Streets, by way of said Doane Street?

Voted: That this article be indefinitely postponed.

Article 48. Henry T. Lincoln and others. Will the Town raise and appropriate the sum of \$600 to build a gravel sidewalk with a concrete edge on the westerly side of South Main Street about 450 feet long to the Scituate line, or act on anything relating thereto?

Voted: That the Town raise and appropriate the sum of \$600 for the above purpose and the kind of edge to be used be left to the discretion of Highway Surveyor.

Article 49. Walter Shuebruk and others. Will the Town raise and appropriate the sum of \$1,000 to purchase a new piano for the Town Hall to be used for concert purposes only?

Voted: That this Article be indefinitely postponed.

Article 50. Ignatius Francis and others. Will the Town raise and appropriate the sum of \$1,000 to repair public highway between C. W. Barron's front drive and Margin and Atlantic Avenue?

Voted: That this Article be indefinitely postponed.

Article 51. Oliver H. Howe and others. Will the Town raise and appropriate the sum of \$250 to aid in celebrating the one hundred and fiftieth anniversary of the incorporation of Cohasset as a Town by an Historical Pageant, or act on anything relating thereto?

Voted in the affirmative.

Article 52. Thomas J. Ayers and others. Will the Town pay \$10 per day for double team and driver for eight hours' work, and pay \$7 per day for single team and driver for eight hours' work, or act on anything relating thereto?

Voted: That this Article be indefinitely postponed.

Article 53. John J. Grassie and others. Will the Town raise and appropriate the sum of \$1,920 to purchase uniforms for the Fire Department?

Voted in the negative.

Article 54. Irving F. Sylvester and others. Will the Town place and maintain an electric light on the southerly end of Cedar Street 400 feet in from North Main Street?

Voted: That the sum of \$18 be raised and appropriated for above purpose.

Article 55. C. H. Trott and others. Will the Town raise and appropriate a sufficient sum of money to install and maintain an electric light on Brook Street midway between Elm Street and South Main Street, or act on anything relating thereto?

Voted: That the sum of \$18 be raised and appropriated for above purpose.

Article 56. Edwin A. Stone and others. Will the Town install and maintain two electric lights on the private way leading from South Main Street to the residence of Joseph E. Grassie, and raise and appropriate \$36 for their maintenance in 1921?

Voted in the affirmative.

Voted: That this meeting be dissolved.

HARRY F. TILDEN, *Town Clerk.*

Cohasset, July 5, 1921.

At a special Town Meeting held this evening the following votes were taken.

Article 1. To choose a Moderator to preside in said meeting.

Chose Harry E. Mapes.

Article 2. To see if the Town will appropriate the sum of \$30,000 to be expended for the purpose of remodelling and improving the so-called "Guild Hall" property into suitable quarters for the George H. Mealy Post No. 118, American Legion, and to borrow the said sum of \$30,000 and to issue its notes or bonds therefor, payable \$5,000, in not more than one year from the date of issue and \$5,000 annually thereafter for the succeeding five years, or act on anything relating thereto.

Voted: That this Article be passed over.

Article 3. George Jason and 141 others. Will the Town raise and appropriate the sum of \$2,000 for the use of the Highway Department, or act on anything relating thereto?

Voted in the affirmative.

Voted: That this meeting be adjourned.

Cohasset, August 3, 1921.

At a special Town Meeting held this evening the following articles were acted upon.

Article 1. To choose a Moderator to preside in said meeting.

Chose Harry E. Mapes Moderator.

Article 2. To see if the Town will vote to raise and appropriate such sum of money as may be necessary for the purpose of remodelling the so-called Guild Hall building for general municipal purposes, or to take any action relative thereto.

Voted: That \$13,635 be appropriated by the Town from this year's tax levy for improvements of the Guild Hall according to plans of architects G. F. Newton, Sr. and Irving Hyland and that the money be expended accordingly under the supervision of said architects and the Board of Selectmen.

Article 3. To see if the Town will vote to authorize the Selectmen to lease for a period of not more than five years such portion of the remodelled so-called Guild Hall building as may be necessary for the use of the George H. Mealy Post.

Voted: That the Selectmen be authorized and instructed to lease to the George H. Mealy Post No. 118, American Legion, for a period of three years from the date of completion of improvements authorized under Article 2, at a yearly rental of \$1, those parts of the Guild Hall planned for such possible use by architects G. F. Newton, Sr., and Irving Hyland submitted to this meeting. Such lease shall provide that said Post shall properly care for and treat said leased premises and shall pay their proportionate share of the heating, lighting and water supply expense and shall provide that such lease will be renewable by three year periods on the same terms. The Town shall pay the insurance on said Guild Hall while thus leased and ordinary repairs.

Article 4. Arthur A. Davenport and 147 others. To see if the Town will reimburse Arthur A. Davenport the amount of \$540.96 being loss caused to him by a ruling of the Board of Health.

Voted in the affirmative.

Article 5. To see if the town will vote to raise and appropriate such sum of money as may be necessary for the support of the public schools to be expended in moving, remodelling and repairing the so-called G. A. R. Hall building for use as a school building or take any action relative thereto.

Voted: That the sum of \$3,473 be raised and appropriated for above purpose.

Voted: That we adjourn.

Births, Marriages and Deaths Recorded at Cohasset in 1921**BIRTHS**

Total number of births was thirty, of which fifteen were males and fifteen females.

MARRIAGES

Total number of marriages was thirty-seven of which twenty-four were married at Cohasset.

DEATHS

Total number of deaths was thirty-six and included fifteen who died in other towns or were brought here for burial; of the twenty-one who died at Cohasset nine were males and twelve were females.

The causes of death were as follows:

Disease of heart, 4; embolism, 3; cancer, 2; diabetes, 2; pneumonia, 2; uremia, senile debility, gangrene, hemorrhage, sarcoma, pemphigus, and angina pectoris, one each.

HARRY F. TILDEN,
Town Clerk.

REPORT OF THE BOARD OF SELECTMEN

To the Citizens of Cohasset:

In making a report of our stewardship for the year 1921 we feel that a volume of words is not needed or expected, for our acts during the year are apparent to all observing citizens.

The work of remodeling the Guild Hall into headquarters for the George H. Mealey Post, American Legion, was completed during the year and it is now occupied by the Post, also affording quarters for the Volunteer Veteran Firemen's Association, in accordance with the vote of the Town, and without expenditure above the appropriation.

The financial report shows over expenditures of appropriations by several departments and it is hoped that the department heads will each recommend such appropriation for the operation of his department for the ensuing year as will care for its needs, and not cause this Board to exhaust its emergency fund for maintenance expense as was the case during the past year, also having in mind the necessity for economy in every department with a view to reducing the tax rate, which last year was the highest in the history of the Town, and at the same time maintain the highest possible efficiency of his department.

Respectfully,
HARRY E. MAPES,
HERBERT L. BROWN,
WILLIAM O. SOUTHER, JR.,
Board of Selectmen.

Cohasset, January 1, 1922.

REPORT OF THE BOARD OF FIRE ENGINEERS

Cohasset, Mass., January 25, 1922.

To the Board of Selectmen.

Gentlemen: The Board of Engineers appointed by your Honorable Board for the year ending April 30, 1922 met in accordance with your instructions and organized with the following choice of officers:

Chief, Fred C. Blossom.
 Assistant Chief, Sidney L. Beal.
 District Chief, George Jason.
 District Chief, Frank F. Martin, Jr.
 Clerk, George F. Sargent, Jr.

From the last annual report it appears that the department has responded to seventy-eight alarms for buildings, chimney, automobile and grass fires including one false alarm.

Number of feet of hose laid 4,950. Number of feet of ladders raised 485. Number of gallons of chemical used (not including grass fires) approximately 600.

The fire losses of the year follow:

Value of buildings and automobiles burned	\$76,800 00
Loss on buildings and automobiles burned	8,800 00
Insurance on buildings and automobiles burned . . .	39,400 00
Value of contents of buildings	7,775 00
Loss on contents of buildings	2,763 00
Insurance on contents of buildings	5,900 00
Total loss on buildings, automobiles and contents . . .	11,563 00

Again this year an amount in excess of our appropriation was spent on the Fire-Alarm System.

Owing to the inaccuracy of Box Alarms received and the

numerous complaints of the citizens it was deemed advisable by the Board of Engineers to have an expert engineer from the Gamewell Fire-Alarm Company to come and go over the system and make recommendations without expense to the Town. The report was received and called for the expenditure of a large sum of money which did not include the extra amount spent on the Fire-Alarm System this year. It was found that all over the town limbs of trees were interfering with the wires, causing short circuits, also that insulators on cross arms were defective.

The outside system at the present time from the Report of the Electrician is in good condition.

Respectfully submitted,

FRED C. BLOSSOM, *Chief*,
SIDNEY L. BEAL, *Assistant Chief*,
GEORGE JASON, *District Chief*,
FRANK F. MARTIN, JR., *District Chief*,
GEORGE F. SARGENT, JR., *Clerk*.

REPORT OF SEALER OF WEIGHTS AND MEASURES

To the Board of Selectmen.

Gentlemen: Your sealer in submitting his ninth annual report would respectfully state that the four hundred and twelve appliances now in use for weighing and measuring in Cohasset have been tested and sealed as required by law and have received such further inspection as would insure their continued accuracy and efficiency. Conditions in Cohasset as reported by the state inspector as regards apparatus, its use and condition, are most gratifying to your sealer and should be equally so both to our dealers and citizens as well.

While the activities of this small department are usually lost sight of when considered with others that require the appropriation of thousands of dollars, nevertheless no department and its work are more intimately connected with the family pocket book, especially in times like the present when the price of commodities is high and money none too plenty. However, whether the public interest may or may not touch this little department, its size and state of mind might perhaps be likened to the so-called "flivver" which without notice chugs merrily along at its business and gets there just the same.

Yours respectfully,

CALEB NICHOLS, *Sealer.*

Cohasset, January 24, 1922.

REPORT OF TREE WARDEN

Cohasset, Mass., January 23, 1922.

To the Citizens of Cohasset:

Your Tree Warden in submitting his report for the year 1921 respectfully states that the year has been a success. greatly due to the mild winter and early spring.

Pruning was done where needed and in some instances it was necessary to cut the trees down, because of inside deterioration, due to limb break and leaf sap.

The trees were sprayed as soon as leafed out in order to suppress the insects before they got the leaves pinholed, which causes a very great sapping of the tree.

A large number of trees were set out and my one hope is that there shall be many more, as they are a great factor in beautifying the town.

Respectfully submitted,

GEORGE YOUNG,
Tree Warden.

GEORGE H. MEALY POST NO. 118, AMERICAN LEGION

Cohasset, Mass., January 26, 1922.

To the Citizens of Cohasset:

We, the members of the George H. Mealy Post No. 118, American Legion, desire to express our appreciation and gratitude to the citizens of Cohasset for their generosity in providing our Post with the splendid, roomy and up-to-date club house which has recently been completed and leased to this Post.

The members of the Post are very enthusiastic and justly proud of their new quarters, which constitute, without doubt, the finest American Legion club house provided for ex-service men, by any town in the State.

We realize and appreciate the fact that this fine club house necessitated a heavy expense and placed quite a burden on the taxpayers. For this sacrifice and generosity on the part of the Cohasset citizens we are deeply grateful and assure you that we shall endeavor to carry on the patriotic work of the American Legion ever true to its high ideals — "For God and Country — for Law and Order."

Yours very truly

For the Post,
EUGENE N. TOWER,
REV. JAMES P. SHERRY,

Committee

REPORT OF THE BOARD OF HEALTH

The following cases of infectious and contagious diseases were reported to this Board during the past year:

Chicken pox.....	25
Diphtheria.....	7
Measles.....	6
Scarlet fever.....	18
Tuberculosis.....	6
Whooping cough.....	17
Lobar pneumonia.....	4

One slaughtering license was granted during 1921.

The inspector of slaughtering inspected (149) one hundred and forty nine carcasses during the past year, (2) two of which were condemned.

Report from the School Dentist

Following is a report from the school dentist to this Board:

Gentlemen:

It gives me pleasure to submit to you the following report which is a summary of the work completed by me since the opening of the School Clinic, and closing with the close of school on December 20, 1921.

Gold fillings.....	8
Gutta Percha fillings.....	1
Silver Nitrate treatments.....	12
Gold inlays.....	2
Gold bridge of two teeth.....	1
Silver fillings.....	1,080
Root canal fillings.....	47
Extractions.....	445

Treatments.....	176
Cleanings.....	278
Enamel fillings.....	229
Gold crowns.....	3
Pulp cappings.....	2
Cement fillings.....	15
Porcelain crowns.....	1

The percentage of children in all grades up to the High School who have had work done at the School Clinic is 69.3%.

Respectfully submitted,

FRANK A. DERBY, D.M.D.

School Test Clinics

This board has instituted a series of weekly free clinics for the purpose of administering the Schick Test to adults and all children of Cohasset two (2) years old or older, in the lower Town Hall every Tuesday from 3 to 4 p.m.

The Schick Test is a simple harmless injection between the layers of the skin usually of the forearm near the elbow. This injection produces a wheal and is often referred to as a "mosquito bite."

The subject is seen again in four days and the findings noted. If the area about the injection is reddened, the subject is liable to contract diphtheria, under proper exposure.

We have thus a test of remarkable value. These who are non-immune or liable to take diphtheria can be made immune or unable to take diphtheria by injecting into the upper arm a toxin-antitoxin mixture (about fifteen drops) once a week for three weeks; gradual immunity is produced and is complete in about two months. The immunity lasts for years and perhaps a lifetime. It is earnestly hoped that all Cohasset citizens and especially parents on whom lies a double responsibility will inform themselves fully on this subject and avail themselves of this means of protection from diphtheria.

It lies entirely with the citizens of Cohasset either to exterminate diphtheria or to sit down and await its onslaught.

Respectfully submitted,

IRVING F. SYLVESTER, *Chairman*,
EDWARD L. HIGGINS, *Secretary*,
FREDERICK HINCHLIFFE, M.D.

REPORT OF THE INSPECTOR OF MILK AND VINEGAR

To the Cohasset Board of Health.

Gentlemen: I have taken numerous samples of milk and caused them to be examined. The analysis shows Cohasset is fortunate in having milk of standard quality.

I have examined vinegar from all the local merchants and it all was practically up to legal requirements.

Ten (10) licenses to sell and deliver milk were issued by me during 1921.

A license was refused to Mr. A. A. Davenport, of Cedar Street to sell and deliver milk in Cohasset after receiving the analysis of the water supply on his farm, which was condemned by the State Department of Public Health.

He appealed from my decision to the State Department of Public Health and a date was set for a hearing.

Board of Health, Cohasset, Mass.

Gentlemen: In accordance with the provisions of Section 41 of Chapter 94 of the General Laws, this department gave a hearing on September 6, 1921, upon the appeal of Mr. A. A. Davenport of Cohasset, from the action of Mr. Irving F. Sylvester, Milk Inspector of Cohasset, in refusing to grant the said Mr. Davenport a license to sell and deliver milk in Cohasset. This matter was again considered at a meeting of the Public Health Council of the Department held on October 11, 1921, and after consideration of all the evidence submitted it was voted that the action of the Milk Inspector of the Cohasset Board of Health in refusing Mr. Davenport a license to sell and deliver milk be approved.

It was also further voted that if upon another investigation by the Division of Sanitary Engineering of this department the water supply of Mr. Davenport's farm is satisfactory and the

cellar well filled, that the Cohasset Board of Health be so notified and the Board be then requested to issue a license to Mr. Davenport.

I am enclosing herewith a copy of a communication which is going forward to Mr. Davenport relative to this matter.

Very truly yours,

EUGENE R. KELLEY,
Commissioner of Public Health.

Respectfully submitted,

IRVING F. SYLVESTER
Inspector of Milk and Vinegar.

Cohasset, January 9, 1922.

REPORT OF THE DIRECTORS OF THE PAUL PRATT MEMORIAL LIBRARY

We herewith submit our report for the year ending December 31, 1921.

The past year has been one of added interest shown in the library as indicated by the increased circulation of books. This is true not only of the central library but applies also to the branches in the Beechwood district and at North Cohasset.

Especially gratifying, as an evidence of interest in library purposes, is the bequest to the Cohasset Free Public Library by Miss Ella Bates, of one hundred dollars for the purchase of books for the Beechwood branch, and a committee representative of the district has been appointed to advise in the carrying out of this bequest.

Very little has been required in the way of repairs for the past year, an improvement of the basement lighting and the installation of additional radiation in the rotunda being the principal items.

We note with regret the withdrawal from the board of the Rev. George A. Mark, occasioned by his relinquishing the pastorate of the First Parish, so that our board is at present lacking in full membership.

Subjoined are the reports of the Librarian and Treasurer, which show in detail the working of the library and the financial transactions involved in its maintenance.

Respectfully submitted,

CHARLES C. WHEELWRIGHT, *President*,
FRED V. STANLEY, *Treasurer*,
EDWARD NICHOLS, *Clerk*,
GEORGE W. COLLIER,
HARRY E. MAPES,
HERBERT L. BROWN,

Board of Directors.

Librarian.

January 18, 1922.

REPORT OF THE HIGHWAY SURVEYOR

Cohasset, January 17, 1922.

To the Citizens of Cohasset:

Following is my report as Highway Surveyor for the past year:

The carting through Doane Street towards the Hingham line, of wood, logs, etc., was very heavy from the early fall of 1920 into January, 1921, causing very deep ruts, and as the weather was mild your surveyor started work on January 7. Over three hundred and fifty loads of stone and gravel were used in this work until it was finished.

After the spring opened the other part of Doane Street was built by the penetration system; nine hundred and thirty yards of stone, two sizes, were used; also one thousand five hundred and sixty yards were built on Margin Street by the same method.

Two very deep catch basins were built and three hundred and eighty feet of glazed drain pipe were laid as outlets; this draining must be done before the macadam is started. Six new catch basins were built and a number of old ones repaired. Nearly all the streets were covered with tarvia and heavy oil. The K. P. patching method we use is used mostly by all superintendents of streets and highway surveys. About forty-one thousand six hundred gallons of tarvia, heavy oil and patching material were used last year. The culvert on Spring Street near the James Pratt Corner so called was taken up and a twenty-four inch corrugated iron pipe thirty-six feet long was laid in its place and covered with a foot of concrete. This work costs a little more than usual but it is a permanent job. All the drains that cross under the streets are being built with corrugated pipes as glazed pipes freeze in the winter and burst. The sidewalks about town were covered with the usual amount of stone dust, screened gravel and cinders.

The part of Jerusalem Road that was built over is standing excellently under the severe test it is getting, notwithstanding other reports. The severe storm of July gutted our streets that are constructed over hills so badly that the two thousand dollars that was appropriated to finish other work had to be used in repairing these streets as some of them were practically impassible. The new road grader was used to a great advantage; all of the gutters were cleaned with this very useful implement. The stone crusher is kept in first-class condition and is ready with very little expense to commence work. About one thousand, two hundred tons of stone were crushed last year. The steam roller is in perfect condition also.

In Memoriam

It is with regret that we record the death of Alson S. Richardson who died in December. He was employed for many years by the highway department of this town, was always faithful and efficient and died mourned by all citizens who have had the pleasure of his acquaintance.

In conclusion your highway surveyor and his associates take this opportunity to thank all for their many acts of courtesy and kindness in the past.

ASSETS OF THE HIGHWAY DEPARTMENT

One Buffalo steam roller and scarifier	\$5,000 00
One stone crusher	900 00
One steam boiler	500 00
One steam drill, etc.	75 00
Two wooden carts and sprayers	50 00
One iron wagon and sprayer	100 00
One watering wagon	25 00
One road scraper	300 00
One road leveller	20 00
One one-horse stone roller	40 00
Three snow plows	90 00
Eight snow plows	200 00

Two gutter plows.....	\$20 00
One one hundred gallon heating cart	30 00
One tool chest and contents.....	60 00
Three barrels patching.....	24 00
One ton steam coal.....	12 00
Chains and tools.....	30 00

\$7,476 00

GEORGE JASON,
Highway Surveyor.

REPORT OF SUPERINTENDENT OF MOTH WORK

To the Honorable Board of Selectmen;

Immediately after being appointed I took up the work of creosoting gypsy-moth egg clusters and cutting brown-tail webs from the trees. This work continued up to the spraying season.

This Town, as well as other towns, was badly infested with tent caterpillar nests, which were very conspicuous along the roadsides and as they feed earlier and faster than the gypsy or brown-tail my first duty was to clear the roadsides of them, which I did.

Spraying was then begun for the destruction of gypsy and brown-tail caterpillars and very good results were obtained, as was shown later on, when the 1921 fall work of creosoting commenced. Gypsy-moth egg clusters and brown-tail webs were not nearly as numerous, therefore the Town is at the present time in a very clean condition regarding these pests.

After the spraying season there was a lot of work done mowing bushes along the roadsides, within the boundaries. This work was done mostly on Pond Street, King Street, Beechwood Street, Doane Street and Forest Avenue.

The engines on both spraying machines have been thoroughly overhauled and are in perfect condition for the spraying season of 1922. The private liability is not as large by far this season as it was last as some of the largest estates in Town were not sprayed this year; also I did not charge for scout work on private property where no nests were found, even though we did look their places over.

Respectfully submitted,

JOSEPH E. GRASSIE.

REPORT OF THE OVERSEERS OF THE POOR

The affairs of this part of the town's work have been carefully conducted and all calls have been properly attended to.

We have been able to keep within our appropriation and have only a small amount of unpaid bills, viz.: \$195.46, these being received too late to be paid before the close of our books.

The Cohasset Home under the same able and efficient management has been well conducted.

We shall be obliged to repair the ceiling in the Home basement and paint the exterior of the house and barn.

The Overseers will have estimates to submit at the proper time.

Dr. Hinchliffe was appointed Town Physician for one year in May.

Miss Mary E. McKeown continues her ministrations as district nurse and we recommend an appropriation to assist in paying her salary.

We recommend an appropriation of \$13,000.00 for this department for 1922 exclusive of repairs and painting.

DARIUS W. GILBERT, *Chairman*,
HERBERT L. BROWN,
HARRY E. MAPES,

Overseers.

Regular Meetings

First Monday of each month at 7.45 p.m., in Osgood School building.

Superintendent of Schools

O. K. Collins, telephone, Hingham 181-W.

Office of Superintendent

The superintendent will be at his office in the Osgood School building on Tuesdays and Thursdays, telephone, Cohasset 290. On other days he may be reached for appointments at telephone, Hingham 181-W.

School Physician

Oliver H. Howe, telephone, Cohasset 14.

School Nurse

Mary E. McKeown, telephone, Cohasset 250.

School Calendar, 1921-1922

First term opens September 12.....closes December 23
 Second term opens January 3.....closes February 17
 Third term opens February 27.....closes April 13
 Fourth term opens April 24.....closes June 29

No-School Signal

The signal will be given by Fire-Alarm and street lights;
 7.45, no morning session; 12.00, no afternoon session.

When the morning session is omitted, the busses will
 start at 12 o'clock to collect the children for the afternoon
 session.

Attendance Officer

REPORT OF THE SCHOOL COMMITTEE

The report of the School Committee for 1921 with the financial statement of the treasurer is herewith submitted to the Town. Full information with respect to the school work will be found in the reports of the Superintendent of Schools, the Principal of the High School and the supervisors of departmental work.

The change in our system of superintendence has worked out in a most satisfactory manner, and the Committee has words of heartiest praise for Mr. Collins' work as Superintendent. A distinct advance has been noted throughout the year not only in the grade of work done but also in the school spirit and general morale. This has been evidenced by less problems of discipline, a gradual awakening to the fact that indifferent and careless work can not be expected to win satisfactory scholarship marks or grade promotion, a livelier interest, keener competition and better sportsmanship in athletic activities, and a belief, shared by scholars and teachers alike, that the schools are on the up grade.

It will be seen by the financial report that the cost of moving and renovating the G. A. R. building exceeded by \$560 the estimates that were given at the special town meeting. After the building was moved it was found that it needed re-shingling. This was done at a cost of \$400, and this together with other minor alterations, not anticipated in the original estimates, accounts for the additional cost. This building, however, makes available for school uses, two well-lighted and comfortable schoolrooms which are of indispensable value in relieving the immediate pressure in the Osgood building. But the problem of larger school accommodations has not been solved. It has simply been postponed.

The budget for 1922 is several thousand dollars larger than last year, if the special amount raised for moving and renovating the G. A. R. building is excluded. The items which are mainly responsible for this increase are three. First, a new item is added to the budget for tuition. The state law compels

the Town to pay the tuition of pupils who attend certain approved trades schools. Very few Cohasset pupils in the past have availed themselves of this provision, but during the present school year twelve pupils have been enrolled at the Quincy Trades School and \$683 was paid by the Town for tuition in 1921. It is estimated that \$1,500 will be needed for this purpose in 1922. Half of the sum expended for tuition is repaid later by the State but the reimbursement comes direct to the town and is not available for school purposes.

Secondly, the experts who have surveyed the Osgood School building from time to time have called attention to a serious defect in its construction, viz., the lack of sufficient windows to give adequate light for school work. This defect can be largely remedied by putting in new windows. The Committee asks for \$1,000 to be expended in putting in new windows in rooms where there is greatest need of more light.

The third item of increased expense is the matter of salaries. In line with the general movement throughout the country the salaries of our teachers have been steadily advanced during the past four or five years. This has been absolutely necessary in order to secure and retain the best teachers available. The estimate for salaries is based on what is actually being paid the teachers for the present school year. It is not anticipated that further increases in any general way will be necessary, as teachers' salaries have reached a fairly stable condition.

The Committee calls attention to the fact that the net cost of the schools for the coming year will be about \$6,250 less than the figures submitted in the budget, for the town will receive from the state treasurer under the provision of the State School Fund Law more than \$4,000, as reimbursement for salaries paid during the year ending June 30, 1922; the proceeds from the school lunch will amount to approximately \$1,500; and half of the amount expended for tuition will be returned by the State.

Respectfully submitted,

THE SCHOOL COMMITTEE.

Total.....	\$59,875.00
------------	-------------

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee and Citizens of Cohasset:

I herewith submit to your committee and through you to the citizens of Cohasset the annual report of the superintendent of schools.

The year has been most satisfactory in many respects. There have been few interruptions, and no serious epidemics to interfere with the work of the schools. The most severe problem we have had to deal with has been the numerous changes in the teaching force. There is no longer an actual shortage of teachers in Massachusetts, but the supply is still so limited that experienced teachers who have shown proficiency in the work are at a premium, and can be secured for vacancies in a town like Cohasset only by paying our maximum salary.

Resignations and Elections

In January Miss Nash resigned and Mrs. Schulmeyer, a teacher of broad experience, was engaged as substitute for the remainder of the year. A change of residence in the spring compelled her to give up the work, and Miss Hennessey, a graduate of Fitchburg Normal, was secured as substitute for the remainder of the year.

In June, Mr. Harper and Miss Bray, high school teachers, and Miss Gushee, Miss O'Malley, Miss Harrington and Miss Collins, teachers in the grades, resigned. Three of these teachers accepted positions in Chelsea at higher salaries, Miss Collins entered Bridgewater Normal School, Mr. Harper took up advanced work, and Miss Bray wished to teach nearer her home.

The position of sub-master in the high school was filled by the election of Mr. James Webster Doyle, a graduate of Boston University. Mr. Doyle teaches history and has charge of the athletics. We feel we were most fortunate in the selection of

Mr. Doyle for this position. Miss Leita L. Sawyer was elected to fill the vacancy caused by the resignation of Miss Bray. Miss Sawyer is a graduate of Boston University, has had successful experience in the schools of Dover and Townsend, and comes to us most highly recommended. She is teaching Latin and English and has charge of the girls' athletics.

Miss Priscilla Moore, a graduate of Bates College, with one year's experience in the junior high at Revere, was engaged for the English work in grades seven and eight. Miss Dorothy Kennett, a graduate of the four years' course at Salem Normal, was engaged for the work in arithmetic in grades seven, eight and nine. Miss Moore is room teacher of one of the seventh grade rooms and Miss Kennett is in charge of the other seventh. We feel that with Miss Bates, Miss Moore, and Miss Kennett in charge of the departmental work in the seventh and eighth grades we are obtaining most satisfactory results.

Miss Helen F. Buckley, a graduate of Bridgewater Normal, was elected for the sixth grade position. Miss Buckley the past year was principal of the graded school at Raynham.

Miss Helen L. Brown, a graduate of Bridgewater Normal, was elected as teacher of the fifth grade. Miss Brown is a graduate of Bridgewater Normal, and has had successful experience in the schools of Northampton.

Miss Grace L. Morton, a graduate of Farmington Normal, with several years experience in schools of Maine and Raynham, Mass., was elected for work in grades one and two. This position was made necessary by the crowded condition of the first and second grades.

It will be seen from the above that thirty-three per cent of our teaching force are serving their first year in the schools of Cohasset. This is in itself a serious problem, one we should not be required to meet often. Notwithstanding this fact, the work has gone on in a most satisfactory manner, and a fine spirit of co-operation exists in the teaching force.

Salaries of Teachers

The question of resignations and the filling of vacancies naturally brings up the subject of salaries. The salaries of the

teachers in both the high school and the grades were raised last September at the rate of \$150 per year.

The following are the salaries now paid: principal of high and junior high school, \$2500; manual training instructor, \$2100; sub-master of high school, \$1600; three teachers in the high school, \$1600 (one of these receives \$100 additional for special work); two, \$1500; and one, \$1400; the teacher of music, \$550. In the junior high grades one teacher receives a salary of \$1450; one, \$1300; and one, \$1200. In the lower grades three receive \$1350; one, \$1300; two, \$1250; and three, \$1200.

In comparison with other towns, the following data secured December 1 shows the relative maximum salaries in towns similar to Cohasset:

Maximum salaries paid elementary teachers: Milton, \$1550; Concord, \$1500; Needham, \$1500; Wellesley, \$1600; Lexington, \$1500; Walpole, \$1500; Winchester, \$1500; Reading, \$1400; Hingham, \$1350; Manchester, \$1500; Cohasset, \$1350.

Maximum salaries paid high school teachers: Milton, \$1700; Concord, \$1800; Needham, \$1650; Wellesley, \$2200; Lexington, \$1800; Walpole, \$1700; Winchester, \$1800; Reading, \$1800; Hingham, \$1600; Manchester, \$1800; Cohasset, \$1600.

Only two of the towns mentioned, Manchester and Wellesley, have a higher valuation per pupil in net average membership. This is the accepted standard of the ability of a town to pay for education.

It will be seen from the maximum salaries paid in the other suburban residential towns that we have not yet reached the standard set by these towns.

New Building

The new building is now completed and is a temporary relief from the congestion in the lower grades. In it we have two well lighted, well ventilated, and well heated rooms. One is being used for the combination first and second grade divisions, which relieves the congestion in these two grades.

The other is used for the drawing classes. The old mechanical drawing room is thereby released for the use of the French and mathematics classes. The old free hand drawing room is not in use, nor should ever a room so poorly lighted and ventilated have been used as a class room.

We must bear in mind that this is only a small step toward correcting the building deficiencies. In the Survey of the Schools of Cohasset made by Professor Johnson, it was pointed out that the Osgood building comes far from serving its present use. The building is badly planned in the arrangement and number of windows. The adaptations made to meet the increased enrollment have increased the faults.

In the lighting of schoolrooms the light should come preferably from the left, or if a part of the light comes from the back, the stronger light should come from the left. Pupils should not sit facing windows. With respect to the direction from which the strongest light comes, only two rooms are commendable, two are moderately faulty, and the rest have serious defects of lights and shadows. The rooms also lack the amount of glass area required. Those on the first floor have the following percentages of deficiency in window area: 24 per cent, 20 per cent, 10 per cent, 24 per cent, 20 per cent, 26 per cent, and on the second floor, 24 per cent, 20 per cent, 10 per cent, 24 per cent, 10 per cent and 18 per cent. I am recommending that in the general appropriation this year an appropriation of \$1000 be made to be used toward correcting these deficiencies. The deficiencies cannot wholly be eliminated, owing to the depth of the rooms which greatly exceeds the standard depth from the windows, but conditions can be greatly improved.

There is immediate need of other additional room. The school is without an assembly hall and gymnasium, a condition which should not exist in a town like Cohasset. The chemical and physical laboratory is ill fitted for the needs of the school. The manual training room is wholly dependent on artificial light. The lumber and machine room takes up space that should be utilized as recreation rooms. The corridor space leading to the toilets is altogether too small. We have forty pupils in each of the fourth, fifth and sixth grade rooms. Any

additional increase in enrollment will call for another teacher for the third and fourth grades, and another for the fifth and sixth grades.

An addition of two rooms would release the assembly hall for assembly and physical training uses. Another room would meet the laboratory needs. Two more are needed for the work in manual training, and within a very short time, two more for the relief of grades three to six. Five rooms and a gymnasium are needed now, and two or three additional rooms soon.

The citizens should be prepared to decide not later than one year from now whether school accommodations should be added room by room, or whether a comprehensive plan should be followed which would care for the schools for a period of years.

Expenditures and Estimate

Attention is called to the tables showing the expenditures for 1921 and the estimate for 1922. Three items should be given especial attention. The increased estimate for salaries is made necessary by the increases in salary made last September, which were in operation only four months of the year. To maintain the same rate of salaries and to grant the usual increases to the teachers who have not reached the maximum will require the amount asked for.

Under repairs, one thousand dollars is asked for to be expended in additional windows as previously mentioned.

Under tuition, there is an estimate of \$1,500 for trade school tuition. At present there are ten students in the Quincy Trade School and two more were in attendance a part of the year. The law requires that the tuition be paid by the town, the State later reimbursing the town one half of the cost. This reimbursement goes into the general fund of the town and cannot be used by the School Department.

Your attention is called to the receipts of the School Department. It will be noted that the receipts for the past year amounted to \$6,091.86, making the net cost of the schools exclusive of the new building \$48,281.84.

School Attendance

Attention is called to the table showing the age and grade distribution for September. The total attendance is two less than one year ago which is accounted for by the fact that ten students were in attendance at the Quincy Trade School. There were only three pupils in school who were three or more years retarded in school work. One hundred and sixty-six pupils were under the normal age for their grade and forty-six were over the normal age for their grade. The large number of under-aged pupils is a strong indication that promotions have not been made difficult in the past.

Promotions

We are trying to stiffen the requirements for promotion. As I mentioned last year in my report, it is a serious matter for a pupil to remain two years in the same grade, but it is a far more serious matter for a pupil to receive promotion without earning it. No pupil will be promoted who fails to receive a passing mark in two major subjects. If a pupil fails in not more than two subjects and is able to make up his deficiencies in the summer school he may receive a trial promotion.

Summer School

A large and very successful summer school was conducted last summer. The teachers were Mr. Morrison, Miss Stanley, Miss Wing and Miss McMahon. There were about eighty pupils in attendance. Arithmetic and English were the subjects taught. All pupils who cared to come were admitted, but no pupil who had failed in more than two subjects could gain a trial promotion by such attendance.

Special Subjects

I wish to call attention to the excellent work done in manual training, household arts and drawing. The fact that the cost of these departments may be large for a town the size

of Cohasset is justified by the results obtained. We have seen fit the present year to secure the services of Mrs. Stevens, the supervisor of music, for an extra half day each week, so that she may be able to take full charge of the music in grades seven and eight as well as in the High School, thereby relieving the room teachers for other class work

The attendance of several boys at the Trade School at Quincy has temporarily reduced the size of the classes in manual training. We are informed by the Trade School that no new pupils will be admitted next September, which will require that we care for the needs of such pupils at home. A lathe would materially increase the efficiency of the department.

Athletics

The superintendent is a firm believer in the importance of physical training and athletic sports in the schools. The past year we have endeavored to make some progress in this line.

The school was represented in the spring by a baseball team that made a very creditable showing. In addition there was a team from the seventh and eighth grades, and a freshman team, each of which played several games both at home and in the neighboring towns. •

Baseball was also played by the girls, and there were several interesting games played between the girls of the Osgood School and the schools in Hingham.

In the fall the Osgood School was represented by a football team in the Junior Triangular League which was composed of two teams from the Hingham Schools and the one from Cohasset.

At present the school has two very good basketball teams. The interest of the public in this sport is evident from the attendance at the home games.

The leadership of Mr. Doyle and Miss Sawyer in the athletics should be warmly commended

When the baseball season again arrives, we shall call upon Mr. Meyer and at least one of the women teachers in addition to Miss Sawyer to assist in supervising this most popular sport.

We expect that the school will be represented by no less than six baseball teams.

No class room instruction can equal the athletic sports in emphasizing the value of health habits and proper physical development.

Auxiliary Agencies

I wish to express my appreciation of the spirit of service shown by the Parent-Teachers' Association, and the Social Service League in the work of the schools. We solicit the interest and co-operation of every organization that stands for the promotion of the public welfare.

Looking Forward

In planning for the immediate needs of the school our present condition needs most serious consideration, but in all public work the future must be considered none the less than the present. A look ten years ahead or even twenty-five years ahead is not visionary, it is common sense.

The kind of a town we will have twenty-five years from now will be the kind of a town we are willing to pay for in the educational advantages offered. Cohasset has no future but that of a residential town. It has an abundance of attractive sites for homes. It is not too far from Boston to be attractive to business men as a place to live in the year round.

The first question that is asked by one contemplating locating in a community is in regard to the efficiency of the schools. In the building program which must come up next year, the question must be considered from every angle, and no plan adopted that will not be a fit unit of the educational equipment ten or twenty years from now.

Conclusion

In conclusion I wish to express to the citizens my appreciation of the interest that is shown in the schools and the spirit of co-operation that is so evident. It is clearly obvious that

you appreciate the significance of the school system in a community. To the teachers who are so zealously serving the community I am grateful for the fine spirit that is always manifested in the work we are doing together; and to the School Committee I wish to express my appreciation for the frank and serious consideration that has been given to all suggestions I may have made and for the confidence that has been expressed in my work.

Respectfully submitted,

O. K. COLLINS,
Superintendent of Schools.

REPORT OF HIGH SCHOOL PRINCIPAL

Mr. Orvis K. Collins,
Superintendent of Schools.

Dear Sir: I submit herewith my fourth annual report as principal of the Cohasset High School.

Our enrollment for the year 1921-1922 is one hundred and nineteen, divided as follows: entering class, thirty-one; second year, forty-two; third year, twenty-one; fourth year, twenty-five. This is a slightly smaller number than last year, due to a smaller entering class, six boys entering the Quincy Industrial School from last year's ninth grade and the removal from town of several families.

For years the free-hand drawing room in the Osgood School has been the subject of unfavorable comment of all who have visited the building and have seen classes at work there. It was small in size and very poorly ventilated. Its use by large classes has been at the expense of the health of those obliged to use it. The addition of the new building gives the art department a room which is well lighted and ventilated, one which has been comfortable even in extremely cold weather and which promises to be cool in the spring and summer months. All the drawing classes of the high school, both free-hand and mechanical meet in the new building, and are enabled to work to much better advantage than heretofore. The room vacated is used as little as possible, a class of five using it only two periods in the week. At present the wireless club is installing its instruments there and is planning to use it for weekly meetings. The removal of desks from the room formerly used for mechanical drawing, the installation of additional blackboards and tablet arm chairs has provided another recitation room for high school use, well lighted and ventilated, suitable for classes not exceeding twenty pupils.

There have been several minor changes in the curriculum. The course in Business Law, given for some years, has been replaced by a course in Business English. It has been thought wise to give the two bookkeeping courses in successive years instead of in the second and fourth years as heretofore, and this plan will be put into operation next year. The first year courses in General Science and Community Civics are given three periods per week during the entire year instead of five periods per week for a half year each. Under the direction of Mr. Meyer, some of the boys of the ninth and tenth grades have been working on a course in practical electricity. Theory and practice have gone hand in hand, the boys having constructed motors, traced circuits, repaired electric bells and learned some of the principles of correct wiring.

In addition to the regular high school baseball team, a junior team was organized last spring. A league, comprising teams from the two grammar schools in Hull, the Lincoln School in Hingham and the Osgood School, was organized, each team playing eight games. Teams were also formed among the girls and in addition to class games, some games with girls' teams from other schools were played. Mr. James W. Doyle, in addition to his work as History teacher, has charge of athletics among the boys of the school, and Miss Leita Sawyer, teacher of English and Latin, has charge of the girls. Under the joint direction of Mr. Doyle and Miss Sawyer, an interclass meet was held in the fall. Events were arranged for both boys and girls and although the participants were handicapped by inadequate grounds the meet was a success, the tenth grade winning by a good margin. Both basketball teams are having a successful season, having won a majority of the games played.

An effort has been made to provide school activities, other than those of the class room, for a larger number of pupils and especially along lines other than athletic. To this end, the last period on Tuesday has been set aside for club activities. At present, we have a wireless club, dramatic club, girls' glee club, and a poultry club. Plans are under way for a school orchestra, a college club, arts and crafts club and a club composed of those interested in a school paper. Each is or will be under the direc-

tion of a teacher or competent leader and it is hoped that they may be of assistance in helping some pupils to decide on their vocation in life as well as to afford opportunities for purposeful activities.

From time to time, speakers have come to the assemblies of the high school, presenting opportunities of the various vocations and some progress in the field of vocational guidance has been made.

My previous reports have called attention to the needs of the high school, such as better facilities for work in physical education, both indoors and out, an assembly hall which may be used for the social activities of the school as well as for dramatics, increased laboratory facilities for the science work of the first two years, more nearly adequate lunch room accommodations and better quarters for the manual training department. These needs are still to be met and until such time, the work of our high school will be handicapped as measured by the newer educational standards.

Respectfully submitted,

ARTHUR C. MORRISON,
Principal.

REPORT OF THE ART DEPARTMENT

M. Orvis K. Collins,
Superintendent of Schools.

Dear Sir: In accordance with your request I submit for your approval the annual report of the art department for the year nineteen hundred and twenty-one.

The usual annual exhibition of drawings and handicraft was held in the Town Hall on the afternoon and evening of June 26. Much credit is due to the teachers of the first, second and third grades and of the Beechwood School for the excellent results obtained in those grades.

A noteworthy event which occurred in December was the removal of this department to new quarters in the annex which has been erected on the school grounds. Our new room has distinct advantages which we enjoy and appreciate. Here the classes of the free-hand and mechanical drawing departments of the High School meet and this centralization of work and materials will result in a saving of time. The lighting is good, making the use of artificial light unnecessary except on very dark days. This feature is appreciated especially by the boys who have worked, heretofore, under very trying lighting conditions. The problem of ventilation which was a serious one in our studio is eliminated in this new room. The greater amount of floor space makes it possible to seat larger classes and the tables may be arranged in more convenient manner. These and other advantages are sure to promote greater efficiency and to produce larger results than have been possible under less favorable conditions.

For the spirit of co-operation and helpfulness which you have shown, I desire to express sincere appreciation.

Respectfully submitted,

FLORENCE E. KRAUS.

January, 1922.

REPORT OF HOUSEHOLD ARTS DEPARTMENT

Mr. O. K. Collins,
Superintendent of Schools.

Dear Sir: I submit for your approval my report as supervisor of Household Arts in the Cohasset public schools.

In September the work of the seventh grade was changed from sewing to cooking. The girls now receive instructions in sewing for three years and in cooking for three years.

"Learn by doing" might be taken as a motto for this department and it is hoped that this "doing" in school may help the girls to appreciate the work necessary in the home and contribute their share toward it.

The girls in the fifth grade make their sewing equipment and a petticoat; the sixth grade make cooking caps and aprons and a princess slip or nightgown.

The girls of the High School classes make various articles of wearing apparel, their final achievement being a dress.

An exhibit of this work was held at commencement in Town Hall in conjunction with the exhibits of the Manual Training and Art Departments.

The seventh grade receive instruction in simple cooking and study the effects of different foods on our bodies.

The upper grades learn the serving of foods as well as the cooking of them by serving in the school lunch room which is run in connection with this department.

From January to June of 1921, the lunch room co-operated with the Social Service in serving milk to underweight children of the lower grades. The Social Service furnished the milk, the children to receive it were recommended by the school nurse and the milk was distributed every school day at 10.00 a.m. and 12.00 m. by the assistant of the lunch room.

Between fifteen and twenty children received milk and in most cases a gain in weight was reported.

At all times the department supervises the lunches of the little children, supplementing them with soup or cocoa when inadequate or the weather is cold and even furnishing lunches for children who for some reason were unable to bring them.

In closing I wish to thank you for your co-operation and to express to the School Committee my appreciation of their helpful attitude toward this department.

Respectfully submitted,

HELEN C. WELCH.

January, 1922.

REPORT OF INDUSTRIAL ARTS DEPARTMENT

Mr. Orvis K. Collins,
Superintendent of Schools.

Dear Sir: I hereby respectfully submit to you my report as director of the Industrial Arts Department for 1921.

"Education is a natural not an artificial process; it is a development from within, not an accretion from without; it comes through the workings of natural instincts and interests and not through response to external force; it is an expression of natural powers, not an acquisition of information, it is life itself, not a preparation for a future state remote in interests and characteristics from the life of childhood."— *Rousseau*.

In harmony with the spirit of the above definition of education, the emphasis in the Industrial Arts Department during the past year has been laid on the development of boys, rather than on the construction of projects. The project has been employed as an agency to challenge the boys to use their natural latent powers, which tends to "put their feet upon the high road that leads on." Four different activities, each basic of many vocations, are now open to the boys, for the broadening of general culture and for tryouts in occupations. Woodwork, printing, metal work and electrical work are making their appeal. A number of boys have definitely decided to enter mechanical or technical trades, and it would not be difficult to point out some other boys whose contact with Industrial Arts in our shop have convinced them that their greatest usefulness lies in other fields.

Our school paper the "Beacon" which was first issued last year has doubled its size and about reached the limit for our pressroom facilities. The classes in electrical work are making small motors, and some are trying their hand at building dynamos and transformers.

Ten Cohasset boys are now at the Quincy Industrial School, learning trades under state supervision. It is the opinion of leaders in education that vocational education is only in its infancy. Owing to the crowded condition at the Quincy School no additional Cohasset boys can be accommodated either this or next year. It would be safe to predict that the Town must look elsewhere for that type of education. The time may come when Cohasset together with other nearby towns will establish a trade school for both boys and girls. The State believes in it to the extent of paying one half of the maintenance of such a school, including teachers' salaries, supplies, etc.

The interests and the quality of abilities of the great majority of our boys do not point to institutions of academic education, but rather to mechanical and technical. I believe that an appeal along this line, with increased periods for shop work, machine and architectural drawing and mathematics for entrance requirements to higher institutions would meet with response. The use of a lathe would correlate with such a course, and I hope it may be possible for us to secure one this year; it would be a stronger factor in the development of boys than any other machine now in the shop, excepting possibly the printing press.

I desire to express my appreciation of your sympathetic supervision and co-operation.

Respectfully submitted,

M. H. MEYER.

January, 1922.

REPORT OF SCHOOL PHYSICIAN

The experience of the past two years has demonstrated the value of frequent inspection of pupils during the existence of contagious disease. Instead of closing schools, they have gone on without interruption and with inspection. Isolated cases of scarlet fever and diphtheria have occurred, but in no case has an epidemic of either disease resulted. The use of the Schick test for diphtheria, which our Board of Health is now introducing, promises to make diphtheria a very rare disease or even obsolete.

There is great need at the present time of more careful supervision of pupils by their parents in the home. The innumerable evening attractions are so tempting that pupils fail to get sufficient sleep during the important period of growth and development. Loss of sleep and dissipation of energy react upon their studies and diminish their vigor as well as their powers of resistance to disease.

The proportion of pupils who can swim is increasing, but not as rapidly as it ought. Cohasset's facilities for sea bathing in the summer are unrivalled and every pupil of ten years or older should have the benefit of this healthful and refreshing exercise, together with the personal safety swimming affords and the ability to save life in case of accident.

With grateful recognition of the co-operation of the committee, superintendent, teachers and the school nurse.

Respectfully submitted,

OLIVER H. HOWE, M.D.

REPORT OF CLUB WORK

Mr. Orvis K. Collins,
Superintendent of Schools.

Dear Sir: I hereby respectfully submit to you my report as director of Club Work for the season of 1921.

Gardeners labored under unusual difficulties last year. Draught and heavy rains alternated during May and June, retarding and injuring gardens on the high and low lands. The majority of the junior farmers, however, finished their project and exhibited at the Town Hall in September.

It was a banner year for poultry and pigs, as may be seen from the many prizes won outside of Cohasset, a record of which follows.

At the Marshfield Fair, Murray Perry won a second and two third prizes on White Rocks, and in competition with adults he won a first and second on beans, and a second prize on cucumbers. Robert Perry received a second and two third prizes on Rhode Island Reds. Charles Henry was awarded a third on White Leghorns, and Thomas Valine, two thirds on White Cochin Bantams and Silver Spangled Hamburgs.

At the Norfolk County Fair at Walpole, Murray Perry won a first prize on a pen of White Rocks, and five first prizes on vegetables as follows: individual collection, beets, beans, corn and tomatoes. Robert Perry was awarded one first, one third and one fourth prize on Rhode Island Reds. Leland Towle won a first and two seconds on White Leghorns. Arnold Peterson was awarded a second prize on a pen of Barred Plymouth Rocks, a first on onions and a second each on beans and carrots. Thomas Valine won a first and a second on his Hamburgs, a first on Cochin Bantams and a second prize on his Berkshire pig.

At the Brockton Fair pigs only were exhibited. Out of

four boys exhibiting Hampshire pigs, Arthur Brassill won the first prize, John Davenport, the second, and John Ayers, the third. The fourth, a boar exhibited by Robert Perry, won a special first prize. Herbert Bates received a first special on a litter of Duroac Jerseys, and Thomas Valine won a second on his Berkshire.

At the recent Boston Poultry Show, Thomas Valine was awarded a first, a second and two thirds on his Hamburgs and Cochin Bantams. Murray Perry won a fourth prize on a White Rock Cock, and Robert Perry took first prize on a Rhode Island Red hen in competition with forty-three others and also a second on a pen of Reds.

The boys are to be congratulated on winning forty-six prizes outside of Cohasset, representing a total of seventy-six dollars in cash.

The poultry club of thirteen boys, owning a total of one hundred fifty-three birds, during the winter meets monthly in the Manual Training room, where the selection and care of poultry is discussed. Mr. Nodine, the state poultry leader, has instructed the boys in caponizing, and Mr. Dizer, the County leader, has performed two operations on birds, each for a different common ailment of poultry.

The work of the canning club was not up to the standard of the last few years, due in part to the graduation from school and the dropping out, of our best canners. During the summer the club meet twice a month at the Bates Building. The girls attended the Sectional Canning Meeting at Weymouth in August, and enjoyed an outing at Nantasket Beach. The club decorated and entered a float in the fourth of July parade, winning a fourth prize. All but one girl exhibited the required amount at the fall exhibit.

Six boys and girls, prize winners from last year, enjoyed the week in camp at Massachusetts Agricultural College. They were Miss Marion Curley, Miss Evelyn Martell, Frank McLean, Murray Perry, Thomas Valine and Herbert Bates. Frank McLean took part in the stock judging and won a ram.

Thomas Valine, through his experience with live stock, has definitely decided to follow Agriculture and Animal Husbandry

and is now attending the County Agricultural School at Walpole. From latest reports he is doing good work there.

A group of boys and girls attended Achievement Day at Walpole last April, and all club members over fourteen years of age enjoyed Walpole Day in August. The trip was made in autos.

The annual exhibit was held in the Town Hall on September 15. The evening program included opening remarks by Mr. Orvis K. Collins, Superintendent of Schools, demonstration of seed planting by Murray Perry, culling of poultry by Thomas Valine, Arnold Peterson and Leland Towle. Reports of week at Amherst by Miss Marion Curley and Miss Evelyn Martell. An interesting and instructive address on "Work and Play" by Mr. Clarence Barron, and the presentation of prizes by Rev. F. V. Stanley, chairman of the school committee.

In behalf of the boys and girls I wish to thank the residents and citizens whose generosity made possible the excellent prizes, and those who gave time and thought to the success of the work. A financial statement, and a complete list of the winners at the Cohasset exhibit will be appended here.

Respectfully submitted,

M. H. MEYER,
Director of Club Work.

January, 1922.

CONTESTS AND AWARDS OF THE BOYS' AND GIRLS' SUMMER PROJECTS

Cohasset, 1921

The prizes were contributed by the following friends and residents of Cohasset: Mr. and Mrs. Hugh Bancroft, Mr. Clarence W. Barron, Mrs. Florence A. Bartow, Mr. and Mrs. Edward B. Bayley, Mrs. Mary K. Bolles, Mrs. George G. Crocker, Miss Muriel Crocker, Mrs. Lewis A. Crosset, Mr. Wendell Endicott, Mr. and Mrs. Edwin L. Furber, Mrs. Margaret B. T. Haven, Mr. Benjamin D. Hyde, Mrs. A. S. Kibbee, Mr. and Mrs. T. W. Little, Miss M. V. McCormick, Mr. and Mrs. J. F. McElwain, Mrs. Arthur N. Milliken, Mrs. A. W. Moors, Mr. Lawrence W. Morgan, Mrs. B. L. Sankey, Mr. and Mrs. Hanson M. Savage, Mrs. Ruth Sears, Mrs. Arthur C. Smith, Mrs. Thomas B. Williams, Mr. Ralph B. Williams and others.

GARDEN CONTESTS

Age 10 to 18

A. *Best cared-for garden.*
